Quantum

Quantum Pathlight VX-650 System Controller for 3.8TB Arrays, Entry-Level Solution (non-EMEA) Provides up to 0.6TB/hr throughput, 20 concurrent virtual tape drives and six virtual libraries. For use with 3.8TB and 7.6TB usable capacity configurations. Includes redundant power; power, serial and Ethernet cables; internal SFPs and optical cables; and documentation. Must order one Pathlight VX-650 Dual Disk Controller, one or two Pathlight VX-650 Disk Storage Arrays with 3.8TB usable capacity, one Pathlight VX-650 VX Policy Management License, and one or two Pathlight VX-650 Software Licenses. Integration services, tape library, external Fibre Channel cables, optional rack and rack power cords must be ordered separately. Requires 4U rack space, Installation Service (SPV45-NSNS-ESSx) and Disk-Based Product System Integration Service (SDBBB-NSNS-PE0x).

\$ 44,750.00 :

D1/D3U-CE-A

Quantum

Quantum Optyon In-line Data Compression Expansion License for DX30/DX100 Expansion Arrays  
For DX30 Expansion Arrays (D3F-EA16/500-J and D3U-EA16/500-J) or DX100 Expansion Arrays (D1F-EA16/500-F and D1U-EA16/500-F). Includes an Optyon In-line Data Compression Expansion License Certificate.

Purchase an Optyon In-line Data Compression Expansion License for EACH DX30 or DX100 EXPANSION array (not including the single array included with DX30 base systems or the dual arrays included with DX100 base systems). If compression will be used, ALL arrays in the system must be licensed for compression. For example, a DX100 with a total of four arrays requires the purchase of two D1/D3U-CE-A Compression Expansion Licenses for the two expansion arrays.

\$ 10,000.00 :

Includes two power sequencers and two power cords with stripped leads (plugs not included and should be locally sourced and attached). Each Power Accessory Kit supports up to four array modules (order one each for the 1st, 5th, 9th and 13th array module).  | \$ | 3,900.00  | : |
| D1U-SW2A-20 | Quantum | Quantum DX100 Fibre Channel Switch with 20 2Gbit Fibre Channel ports, field upgrade Must be ordered with ninth array in a non-factory racked configuration (including counting the first two arrays that are included with the base DX100 system). Not required with D1F-ERAK-B or D1U-ERAK-B (which already include a Fibre Channel Switch). Includes two power cords with C13-to-C14 plugs.  | \$ | 10,000.00 | : |
| D3-16/500-C | Quantum | Quantum DX30 Disk-Based Backup System, 8TB (raw), Optyon Compression-Ready, without installation service Includes one 3U controller module with Optyon data compression card with dual 2Gbit/sec Fibre Channel host interface ports, redundant power supplies/fans, 10/100/1000 Base-T management port, and library emulation software; one 3U storage array with single RAID controller, redundant power supplies/fans and 16 500GB SATA disk drives; two 10ft (3m) LC-to-LC cables; and four power cords with NEMA 5-15P plugs (power cords with different plugs must be sourced locally by the customer, if required). Provides approximately 6.5TB usable capacity with RAID 5 and one hot spare drive (factory default). Requires 6U rack space. Installation (SN-D1-PNx) and Disk-Based Product System Integration Service (SDBBB-NSNS-PH0x) are required. Order D3U-CB-A to activate compression feature. | \$ | 60,000.00 | : |

| D3F-EA16/500-J | Quantum | Quantum DX30 Expansion Array, 8TB (raw), without installation service, initial order<br>Add to initial order to expand the capacity of D3-16/500-C non-factory racked system. Includes one 3U storage array with single RAID controller, 16 500GB SATA disk drives, redundant power supplies/fans and two power cords with NEMA 5-15P plugs (power cords with different plugs must be sourced locally by the customer, if required). Provides approximately 6.5TB usable capacity with RAID 5 and one hot spare drive (factory default). Maximum four arrays (one included with base DX30 plus three additional expansion arrays). Requires 3U rack space. The required DX30 system installation charge SN-D1-PNx includes the base system plus up to two additional initial order expansion arrays installed at the same time as the system. The SN-TC-AHx Field Add-on/Upgrade Additional Hours Trip Charge (two hours per expansion array) will apply for initial installations that include more than two additional initial order expansion arrays. Order D1/D3U-CE-A for each expansion array to activate compression feature (base price \$52,500.00). |    |             |

| P2-P7U-FM    | Quantum | Quantum P2000-P7000 cooling redundancy upgrade: single fan module, field upgrade Provides cooling redundancy. Library continues to operate if there is a fan failure. Fans can be hot swapped without taking library offline. This kit includes one additional fan module. For complete cooling redundancy, must order two kits to upgrade non-redundant cooling P2000/P4000 library from two to four fans or three kits to upgrade non-redundant cooling P3000/P7000 library from three to six fans. Customer installable. Last order date 30JUN07.   | \$ | 1,950.00 | : |
| P2-P7U-FM350 | Quantum | Quantum P2000-P7000 FM350 ALERT Fibre Channel Management, field upgrade Maximum one. Requires MC350 Prism Management Card and one or more FC230 Fibre Channel Routers. Not available with MC100 or FC470. A maximum of three library frames connected via Pass-Through Mechanism is supported with MC350 and the single MC350 must be installed in the master frame; however in a dual- or triple-frame configuration, an FM350 is required for in each library frame. If ordered with a library, installation is included in library installation charge; otherwise, Field Add-on/Upgrade Trip Charge is applicable. Last order date 30JUN07. | \$ | 995.00   | : |

| PR-UU9CF-YF | Quantum | Quantum PX500 Series FC1202 2Gb Fibre Channel Bridge, field upgrade<br>Maximum two tape drives per FC1202. Use 2Gb network for optimal performance. Recommend one LTO-3 drive per bridge if using compression. Total number of FC1202 and/or TC2201 boards in PX502, PX506 and PX510 is one, three and five, respectively. By removing the SCSI robotics controller, one additional FC1202 can be added to PX506 or PX510 if all drives are connected via Fibre Channel (none to SCSI hosts) and robotics are controlled via Fibre Channel. Includes 10 ft (3.1 m) Ethernet cable with RJ45 connectors and 2.5 ft (0.8 m) SCSI cable with male HD68 connectors. Refer to the footnote for important installation and warranty information and requirements. | \$ | 4,995.00  | : |

| TC2201E-A   | Quantum | Quantum TC2201E iSCSI-to-SCSI External Router, rackmount<br>iSCSI-to-SCSI 2x2 1U rackmount storage router. Provides two GbE iSCSI ports and two Ultra 160 SCSI ports for attaching SCSI tape drives and library robotics interfaces. Advanced I/O processor architecture for full hardware off-load of both iSCSI and TCP/IP protocol processing. Also supports Web based administration via a dedicated Ethernet IP port. Includes auto-sensing 120/240VAC power supply, integrated cooling fan, rackmount hardware, two 6.6ft (2m) SCSI cables with 68-pin VHDCI to 68-pin standard SCSI connectors, one RJ-11 serial cable for service access, and 6ft (1.8m) power cord with NEMA 5-15P plug for North America (power cord with different plug must be sourced locally by the customer, if required). Customer must provide one RJ-45 Ethernet cable for Web administration and one or two RJ-45 Ethernet cables for connection of network to iSCSI Storage Router. | \$ | 5,495.00 | : |

TS220-2J

Quantum

Dinostor TS220F Fibre Channel TapeServer (two-drive license) for Quantum DX-series and Fibre Channel-connected libraries  
1U-high rackmountable Gigabit Ethernet to 2Gbit Fibre Channel router (two GbE x one FC ports). Facilitates the movement of data between NAS filers supporting NDMP protocol and Fibre Channel-connected tape libraries or DX-series Disk-Based Backup Systems. For Quantum tape libraries with routed Fibre Channel, connects to a Fibre Channel port on an FCxxx Fibre Channel card and controls up to two tape drives. For PX720 with native Fibre Channel drive(s), connects to a single NFC drive. For DX-Series, connects to a Fibre Channel port and controls up to two virtual tape drives. Suitable for DLT8000, SDLT 220/320/600 and LTO-1/-2/-3. Requires customer-supplied multimode Fibre Channel cable with LC connector. May require JIT (Just-In-Time) Interoperability Certification and Test Configuration Report. See product note for additional information.

TS220-2L

Quantum

Dinostor TS220L LVD SCSI TapeServer (two-drive license) for all Quantum tape libraries (except ValueLoader)  
1U-high rackmountable Gigabit Ethernet to LVD SCSI router (two GbE x two LVD SCSI ports). Facilitates the movement of data between NAS filers supporting NDMP protocol and SCSI tape libraries. Connects up to two LVD SCSI tape drives (one drive per SCSI bus). Suitable for DLT8000, SDLT 220/320/600 and LTO-1/-2/-3. Requires two 68-pin LVD SCSI cables (customer supplied or order TS200-CBL22). May require JIT (Just-In-Time) Interoperability Certification and Test Configuration Report. See product note for additional information.
